As Many have learned, a crypto Coin (or Crypto Currency) is a digital asset designed to work as a medium of exchange that uses cryptography to secure its transactions, to control the creation of additional units, and to verify the transfer of assets. Crypto currencies are a type of digital currency, alternative currencies or virtual currency.

Crypto currencies use decentralized protocols as opposed to the centralized controlled money seen in central banking systems. The decentralized protocol of each crypto currencies works through a block chain, which is a public transaction database, functioning as a distributed ledger. There are many thousands of different crypto coins in the world, but no coin has yet been dedicated to the coming of Moshiach. We have learned of efforts within our community to generate a new currency dedicated to the coming of Moshiach where information is expected to be made available through www.moshiachcoin.com.

The Chabad Israel Center of Los Angeles, California Blesses any efforts to bring into being a decentralized autonomous organization that would be established to generate a crypto currency dedicated to the coming of Moshiach. This organization should aim to unite all Jewish people and utilize the coinage in order to increase charitable giving and all activities that foster the blessed age of Moshiach.
